Feature your smile during treatment, not your braces

Thinking about how you will look during treatment? Wondering how many pictures you — and your braces — will be in during your treatment? With ClearVu Cosmetic Braces you don't have to think about either.

ClearVu Cosmetic Braces are designed not only to correct your teeth efficiently and effectively, but also provide you the most comfortable, visually pleasing braces available. Choosing ClearVu Cosmetic Braces means you will be able to feature your smile, not your braces, throughout your treatment.

Combined with tooth-colored wire, your braces are almost invisible.

Smile with confidence for the camera. Your ClearVu Cosmetic Braces won't even show in most photos.

The only braces that match *your* smile

Imagine wearing braces that blend in with the shade of your teeth so well that people might not even notice you're wearing them. Only ClearVu Cosmetic Braces feature *Personalized Color-Matching Technology*, which allows them to match virtually any tooth shade by blending in with the surrounding enamel.

As a result, your smile is what others will see, not your braces. Since ClearVu Cosmetic Braces are non-staining, you can be assured your braces remain the same matching shade throughout your treatment.

Breakthrough cosmetic design blends your braces so they match your teeth. You'll look great throughout your treatment.

Wearing braces should be comfortable

ClearVu Cosmetic Braces work without compromising your comfort. The braces are small and sleek with an ultra-smooth surface, and are specifically designed to minimize any irritation or discomfort.

Wearing braces shouldn't interfere with your life

ClearVu Cosmetic Braces are made from the most advanced ceramic material available in a design ideally suited for the most effective, efficient treatment possible. This means you can go about your busy, active lifestyle — without you or your doctor worrying about the stability, strength or performance of your braces. Living your life is all you need to do; ClearVu Cosmetic Braces and your doctor will do the rest!

Removal of your braces

Only ClearVu Cosmetic Braces have a protective polymer layer between the braces and the tooth enamel. So, when it comes time to remove your braces, they will come off easily without damaging your teeth. This makes removing the braces easier for your doctor and more comfortable for you.
